- Logic Building
- Mobile Friendly

Taxation Expertise

- FBR Income Tax (IRIS)
- Sales Tax (STRN/SRB)

Corporate & Legal

- SECP Registration
- IPO Trademark
- WeBOC Licensing

PROFILE SUMMARY

Multi-talented professional with a unique convergence of "Software Engineering" and "Taxation Expertise". I specialize in crafting high-performance, responsive web interfaces using modern frontend technologies, while applying the meticulous data precision and analytical mindset gained from my background in corporate tax consultancy.

A fast learner and dedicated problem-solver, I enjoy building clean, user-centric digital solutions. My goal is to leverage my technical skills in "HTML, CSS, and JavaScript" alongside my professional experience in "FBR & SECP compliance" to contribute effectively to innovative projects and bridge the gap between complex logic and seamless user experiences.

TECHNICAL EXPERIENCE

Independent Frontend Developer — 2024 - PRESENT

Project-Based Development

- Built end-to-end responsive websites using Tailwind CSS.
- Translated Figma designs into pixel-perfect functional code.
- Optimized web performance for fast loading times.

KEY PROJECTS

SWIFTCART E-COMMERCE

Built a high-performance shop with "Tailwind CSS". Features dynamic product filtering, a real-time JS cart system, and a fully responsive checkout flow.

INTERACTIVE QUIZ APP

A logic-based app using "Vanilla JavaScript". Includes multiple categories, real-time score tracking, countdown timers, and a detailed results dashboard.

ALPHAWEAR BRAND UI

A premium fashion landing page focused on "UI/UX design". Optimized for Core Web Vitals with smooth scrolling, animations, and a mobile-first layout.

MODERN COUNTER APP

A sleek utility demonstrating "DOM manipulation". Features state-based counter logic (Increment, Decrement, Reset) with a minimalist dark-mode interface.

EDUCATION

DAE in Software Engineering — 1ST YEAR
Sindh Board of Technical Education
